27 October 2026

To the households, businesses and community groups of Moyne, Templetuohy, Loughmore, Castleiney and Glengoole and surrounding areas

Re: Tipperary Decarbonising Zone (DZ) 5 village Solar Meitheal – Introducing Ecoplex Energy

A Chara,

We are delighted to have been selected as the approved installer for the Tipperary DZ 5 village Solar Meitheal. This letter tells you who we are, how we work, and what you can expect from us if you decide to take part. We would love to meet you at the community information event in Moyne Community Hall (E41 EE39) on Wednesday 4 November, from 6pm to 9pm.

Who we are

Ecoplex is an Irish, SEAI-registered solar PV and battery installer. Since 2020 we have completed more than 12,000 installations across Ireland, including over 2,000 in the last 12 months.

We do the work ourselves. Our own designers, installers, electricians and aftercare team look after every job, and none of the Meitheal installations will be subcontracted. Two Tipperary-based apprentices will work on the local crews.

We are trusted to deliver group schemes for some of Ireland's best-known energy companies:

- **Bord Gáis Energy** – install partner on the SEAI Medically Vulnerable Solar Scheme, more than 100 homes
- **Electric Ireland Superhomes** – solar PV on around 60 deep-retrofit homes a year since 2025

- **Businesses and community buildings** – including 73 kWp for An Post Insurance and 53 kWp for Precision Heating

Our promise to every Meitheal household

What you get	Our commitment
One named contact	Emer Brangan, Meitheal Project Coordinator, from survey to switch-on
A fixed, open price	3% Meitheal discount, held until 5 April 2027. Any extra work is quoted before you sign, never added afterwards
Workmanship warranty	5 years for Meitheal homes, up from our standard 2 years
Equipment warranties	Jinko panels 25 years product and 30 years performance; EcoFlow battery 15 years; inverter 10 years
Fast aftercare	Faults attended within 48 hours. Aftercare line 01 224 8365
Paperwork done for you	SEAI grant claim, ESB Networks notification, electrical certificate and post-works BER
Safe, tidy work	Scaffold or edge protection on every pitched roof, photo ID on every crew, site left clean

Our quality and safety systems are independently certified to ISO 9001:2015 and ISO 45001:2018, and our safety officer audits sites every month. Every system is installed and certified by registered electricians.

What happens next

1. **Collect your proposal.** If you have already registered with TEA, your personal design and price will be ready for you at the event on 4 November.
2. **If you have not registered, book a free survey.** There is no obligation to proceed. We check your roof and electrics and confirm the design.
3. **Sign up by Friday 4 December 2026.** Places are first come, first served.
4. **Installation from 11 January 2027.** Village by village, usually one day per home, with all works finished by the end of April 2027.

5. **Can't make the event?** If you cannot attend the launch event on 4 November, you can contact us directly to make an enquiry.

If you receive Fuel Allowance, Working Family Payment or certain other welfare payments, you may qualify for SEAI's new enhanced grant of up to €9,000 towards solar and a battery. Ask us at the event, or contact Emer, and we will check your eligibility and handle the application for you.

Together, the 62 households on the Meitheal list could generate around 352,000 kWh of clean electricity a year and avoid about 88 tonnes of CO_2. That is a real step for the Decarbonising Zone, and every home that joins adds to it.

We look forward to meeting you on 4 November, and to working with you over the coming months.

Is mise le meas,

Richard Sheridan

Chief Sales Officer, Ecoplex Energy Solutions Ltd
